EDUCATION ♦

- 1900 – 1905 ♦ Ph.D. in Physics** | European Research University (ERU)
- **Focus:** Theoretical physics, mathematical modeling, statistical analysis, scientific writing
 - **Rel. Coursework:** Relativity, Quantum Theory, Statistical Physics, Thermodynamics
- 1896 – 1900 ♦ Diploma in Physics and Mathematics** | Technical Institute of Europe (TIE)
- **Rel. Coursework:** Mathematical Modeling, Differential Equations, Linear Algebra, Tensor Analysis

RESEARCH ♦ EXPERIENCE

- 1905 – 1905 ♦ Doctoral Research** | European Research University, Europe
- **Topic:** Foundational Work in Theoretical Physics
 - Developed theoretical frameworks to resolve inconsistencies in classical physical models.
 - Proposed new conceptual interpretations of space, time, and physical systems.
 - Communicated complex scientific ideas through rigorous analytical writing.
- 1900 – 1900 ♦ Research Project** | Technical Institute of Europe, Europe
- **Topic:** Research on Light-Matter Interaction
 - Investigated theoretical explanations for light-matter interaction phenomena.
 - Connected theoretical reasoning with experimental observations in early modern physics.
- 1900 – 1901 ♦ Independent Research Training** | European Research Center, Europe
- **Topic:** Statistical Analysis of Microscopic Motion
 - Applied statistical methods to explain microscopic random motion in physical systems.
 - Translated microscopic assumptions into observable macroscopic predictions.

PROFESSIONAL ♦ EXPERIENCE

- 1902 – 1909 ♦ Technical Expert** | Technical Patent Office, Europe
- Reviewed technical applications with a focus on mechanical and electrotechnical systems.
 - Evaluated technical concepts with precision and concise written reasoning.
 - Balanced full-time technical work with independent research activities.

1933 – 1955 ♦ **Professor** | Advanced Research Institute, United States

- Conducted advanced theoretical research in gravitation, cosmology, and field theory.
- Contributed to academic leadership through research, writing, and scientific exchange.

SKILLS ♦

Technical & Computational Skills ♦

- **Research & Analysis:** Theoretical Analysis, Problem Solving, Concept Development, Scientific Writing
- **Mathematics:** Mathematical Modeling, Differential Equations, Linear Algebra, Tensor Analysis
- **Physics:** Relativity, Quantum Theory, Statistical Physics, Thermodynamics
- **Tools:** LaTeX, Archival Research, Academic Writing

Languages ♦

- German (Native), English (Professional), French (Working Proficiency)

PROJECTS ♦

Research Project ♦ **Computational Modeling Project**

- Developed theoretical frameworks to resolve inconsistencies in classical physical models.

Technical Project ♦ **Scientific Data Analysis Workflow**

- Applied statistical methods to explain microscopic random motion in physical systems.

Applied Project ♦ **Automation and Reporting Pipeline**

- Communicated complex scientific ideas through rigorous analytical writing.
